

Recommended study plan

Degree of higher education	I. (Bachelor's study)		
Name of the study program	Management of security systems		
Number and name of the field of study	2 Safety and Security Sciences		
Awarded academic title	Bachelor (Bc.)		
Study form	full time	3 years	6 semesters
The person responsible for the implementation, development and quality of the study program	Prof. Ing. Josef Reitšpís, PhD.		

I. year

Winter semester

<i>Code</i>	<i>Compulsory subjects</i>	<i>Number of credits</i>	<i>Range, evaluation</i>	<i>The person securing the subject</i>
831 1 2 05	Mathematics	5	1-2, c, e	Assoc. Prof. RNDr. František Olejník, PhD.
831 1 2 010	Fundamentals of Legal Theory and Constitutional Law	5	2-1, c, e	JUDr. Štefan Jakabovič, PhD.
831 1 2 24	Sociology and Psychology	5	2-1, c, e	PaedDr. Ivana Fedurcová, PhD.
831 1 2 130	Theory of Security	5	2-1, c, e	Assoc. Prof. JUDr. Štefan Kočan, PhD.
831 1 2 28	Introduction to Economy and Economics	4	1-2, c	Assoc. Prof. Ing. Martin Mašľan, PhD.
831 1 2 070	Fundamentals of Mechanical Engineering	4	1-2, c	Prof. Ing. Vladimír Klimo, PhD.
831 1 2 39	History of Statehood	2	2-0, c	Prof. Ing. Vladimír Klimo, PhD.
	In sum	30		

<i>Code</i>	<i>Compulsory elective subjects</i>	<i>Number of credits</i>	<i>Range</i>	<i>The person securing the item</i>
831 1 2 32	Foreign Language I.	2	0-2, c	Mgr. Natália Töröková
	In sum	2		

<i>Code</i>	<i>Elective subjects</i>	<i>Number of credits</i>	<i>Range</i>	<i>The person securing the item</i>
831 1 2 37	Physical Education I.	0	0-2, c	Ing. Peter Havaj, PhD.
	In sum	0		

Summer semester

<i>Code</i>	<i>Compulsory subjects</i>	<i>Number of credits</i>	<i>Range</i>	<i>The person securing the item</i>
831 1 2 31	Data Processing	5	1-2, c, e	Ing. Radoslav Šulej, PhD.
831 1 2 091	Fundamentals of Civil Engineering	4	2-1, c	Prof. Ing. Vladimír Klimo, PhD..
831 1 2 301	Informatics	5	1-2, c, e	Ing. Radoslav Šulej, PhD.
831 1 2 060	Physics	5	1-2, c, e	Assoc. Prof. RNDr. František Olejník, PhD.
831 1 2 361	Weapons and Explosives	4	2-1, c	Ing. Peter Palko, PhD.
831 1 1 29	Basics of Business	4	0-2, c	Assoc. Prof. Ing. Martin Mašľan, PhD.
831 1 2 08	Graphical Projection Methods	3	0-2, c	Prof. Ing. Vladimír Klimo, PhD.
	In sum	30		

Code	Compulsory elective subjects	Number of credits	Range	The person securing the item
831 1 2 331	Foreign Language II.	2	0-2, c	Mgr. Natália Töröková
	In sum	2

Profile subjects of the study program are highlighted in bold

Paths in education:

The student has the opportunity (not the obligation) to choose a path/trajectory in education - profiling when creating study plans. Using knowledge from compulsory and compulsory optional subjects, he develops his creative and practical skills in selected subjects:

- Security of financial operations and corruption - the student is profiled in the area of the following knowledge:
 - business basics
 - basics of economics and economics
 - ways of protecting economic interests
 - economic security risks,
 - revealing and clarifying illegal economic activity,
 - offensive and defensive competitive intelligence,
 - fight against corruption.
- The environmental security student is profiled in the area of the following knowledge and skills:
 - basic knowledge and overview of legislation related to the environment
 - theoretical knowledge of environmental issues and related concepts
 - knowledge in the field of pollution, degradation and protection of individual components of the environment
 - knowledge in the field of environmental security and crimes against the environment
 - technical skill and ability to search for relevant data in connection with the environment and work with relevant information systems and databases
 - knowledge in the field of environmental management - voluntary tools (environmental policy, environmental management systems), assessment of environmental impacts, environmental labeling of products, approaches of organizations to the environment, etc.
 - basic knowledge of environmental risks, industrial accidents, natural disasters, hazardous substances
 - basics of fire protection.
- Cyber security - the student is profiled in the area of the following knowledge:
 - Basic knowledge and overview of IT security standards. (ISO27001- Information Security Management Systems, ISO22301 - Business Continuity Management, PCI DSS - Payment card Industry, Data Security Standard)
 - Basic overview of legislation (GDPR, Act on the Protection of Confidential Information, Act on Information Technologies in Public Administration, Act on Electronic Signatures, Act on Cyber Security)
 - Technical knowledge in the field of ICT (OS Windows, OS Linux (control of the architecture of the given OS),
 - Networking (introduction to the network, routing and switching , knowledge of communication protocols TCP/IP, firewall, IDS/IPS),
 - Technical knowledge in security (fundamentals of cryptography (PKI), knowledge base of attack techniques, virus protection and content filtering, basics of vulnerability management (VMS)).
- Security in transport and transport infrastructure - the student profiles himself in the area of the following knowledge:
 - transport and transport infrastructure,
 - transport and transport protection,
 - revealing and clarifying illegal activity in transport,
 - traffic - engineering activities in the area of police activity,
 - critical infrastructure of the state – transport sector,
 - safety technologies for the protection of people and property in transport.

Study in profiling is mostly oriented towards thematic creative activity of the student, while it includes:

- Work in small groups under the guidance of the head of profiling in selected subjects (semester project, professional practice, final thesis),

- According to the profile, a themed final thesis corresponding to the study program, field of study and degree of study,
- Thematically related compulsory optional subject of the state exam.

For profiled studies, the student uses:

1. knowledge from compulsory subjects, the content and focus of which are directly related to the chosen profile and develops them in creative activity,
2. Transferable knowledge, skills and competences acquired in the compulsory subjects of the bachelor's study program,
3. Alternatively, other training, certifications and qualifications that are related to profiling and are offered by the school or its partners as further education in the field of study. The results of this education outside the university in domestic and foreign institutions are recognized by the university if their content is directly related to the educational activity in the subject of profiling and valid certification is generally accepted as the fulfillment of one of the educational outcomes (up to the credit level). The rules for this procedure are defined in the information sheet of a specific subject in the section of conditions for passing the subject.

State final exam

<i>Code</i>	<i>Mandatory subjects</i>	<i>Number of credits</i>	<i>Range</i>	<i>Subject teacher</i>
831 1 2 42	Security Technologies	6		Commission
831 1 2 43	Bachelor's Thesis Defence <ul style="list-style-type: none"> • without profiling • SFOaC • ES • CS • STaTI 	6		Commission
	In sum	12		

<i>Code</i>	<i>Compulsory elective subjects</i>	<i>Number of credits</i>	<i>Range</i>	<i>Subject teacher</i>
831 1 2 44	Protection of Information and Communication Systems	4		Commission
831 1 2 45	Transport Security Systems	4		Commission
831 1 2 46	Persons and Property Fire Protection	4		Commission
831 1 2 47	Economic Instruments of Persons and Property Protection	4		Commission
	In sum	16		

Note: The student chooses only one of the mandatory optional subjects of the state exam.

State examination (1st degree of higher education):

- Defense of the bachelor's thesis (abstract in English) in the range of 40-50 A4 pages, in which the graduate must demonstrate the ability to apply the acquired theoretical knowledge, skills and competences in solving practical problems of a security nature and solve them independently.
- The ability to solve assignments based on the expected application of the graduate is verified.
- The colloquial exam is used to verify the fulfillment of educational goals by acquiring and understanding the required knowledge, skills and competencies of the graduate, which were individually mastered in the form of educational outputs during the course of study.

Other requirements:

- **The learning outcomes** (also marked as " LO ") **and the related criteria and rules for their assessment** are listed in the individual subject information sheets in the "Education outcomes" section and in the "Subject completion conditions" section.
- **Pre-requisites** and **co-requisites** are listed in the subject information sheets,

- **The educational activities used** , suitable for achieving the educational outcomes, are listed in the subject information sheets in the section "Conditions for passing the subject" for each educational outcome separately,
- **The method of education** is:
 - o attendance,
 - o Distance
 - o combined,
 Technical means for online teaching (MS Teams and Moodle) are also used for individual education methods.
- **syllabi** are available in the Moodle system (<https://moodle.vsbm.sk>),
- **the student's workload** is defined in the so-called Subject plans for individual subjects separately. The workload depends on the number of credits and is budgeted for lectures, seminars, projects, and independent study in order to fulfill ECTS rules (EHEA).
- **Credits** are assigned to each subject separately. The share of profile subjects is as follows:

Profile subjects of the study program in total	115 credits
Other subjects of the study program in total	83 credits
In sum	198 credits
Covering the core of the field of study with profile subjects of ŠP	58.08%
