Profile subjects of the study program are highlighted in bold

Paths in education:

The student has the opportunity (not the obligation) to choose a path/trajectory in education - profiling when creating study plans. These are profiles:

- Security of financial operations and corruption

- Environmental security
- Cyber security
- Security in transport and transport infrastructure

The choice of a specific profile is conditional upon completion of the same profile within the bachelor's study program *Management of Security Systems (MSS)* at USM in Košice. Completion of Bc. profiling, the applicant declares during the admission process by showing a profiling diploma. If the applicant has completed another bachelor's study program and it covers the RBS profile, he/she will prove this with a list of subjects and information sheets of selected subjects during the admission procedure. The assessment and decision on the acceptance of such an alternative fulfillment of the condition is carried out by the relevant head of profiling during the admission procedure.

During the Ing. study, using knowledge from compulsory and compulsory optional subjects, develops creative and practical skills in selected subjects. It is assumed that the main potential of profiling knowledge was acquired in the bachelor's degree. In engineering studies, profiling is focused on the development of the application of broader knowledge and skills from Ing. study while solving a creative activity themed according to the type of profiling, all under the expert guidance of the head of profiling. Profiling creative activity must be different in level from bachelor's work and must meet the requirements of the national qualification framework for level 7, as well as the principles defined by the dublin descriptors for this level of education.

For profiled studies, the student uses:

1. knowledge from compulsory subjects, the content and focus of which are directly related to the chosen profile and develops them in creative activity,
2. Transferable knowledge, skills and competences acquired in the compulsory subjects of the bachelor and engineering study program,
3. Alternatively, other training, certifications and qualifications that are related to profiling and are offered by the school or its partners as further education in the field of study. The results of this education outside the university in domestic and foreign institutions are recognized by the university if their content is directly related to the educational activity in the subject of profiling and valid certification is generally accepted as the fulfillment of one of the educational outcomes (up to the credit level). The rules for this procedure are defined in the information sheet of a specific subject in the section of conditions for passing the subject.

State Examination

<i>Code</i>	<i>Mandatory subjects</i>	<i>Number of credits</i>	<i>Range</i>	<i>Subject teacher</i>
831 2 2 25	Organization Security Management	7		Commission
831 2 2 26	Master's Thesis Defence	8		Commission
	In sum	15		

<i>Code</i>	<i>Compulsory elective subjects</i>	<i>Number of credits</i>	<i>Range</i>	<i>Subject teacher</i>
831 2 2 27	Legal Aspects of Persons and Property Protection	5		Commission
831 2 2 131	Buildings Protection Projecting	5		Commission
831 2 2 28	Criminalistic Sciences	5		Commission
	In sum	15		

Note: The student chooses only one of the compulsory optional subjects.

State examination (2nd degree of higher education):

- Defense of the diploma thesis (abstract in English) in the range of 60-70 A4 pages, in which the graduate must demonstrate the ability to apply the acquired theoretical knowledge, skills and competences in solving practical problems of a security nature and solve them independently.

- The ability to solve assignments based on the expected application of the graduate is verified.
- The colloquial exam is used to verify the fulfillment of educational goals by acquiring and understanding the required knowledge, skills and competencies of the graduate, which were individually mastered in the form of educational outputs during the course of study.

Other requirements:

- **The learning outcomes** (also marked as " LO ") **and the related criteria and rules for their assessment** are listed in the individual subject information sheets in the "Education outcomes" section and in the "Subject completion conditions" section.
- **Pre-requisites** and **co-requisites** are listed in the subject information sheets,
- **The educational activities used**, suitable for achieving the educational outcomes, are listed in the subject information sheets in the section "Conditions for passing the subject" for each educational outcome separately,
- **The method of education** is:
 - o attendance,
 - o distance
 - o combined,
 Technical means for online teaching (MS Teams and Moodle) are also used for individual education methods.
- **syllabi** are available in the Moodle system (<https://moodle.vsbm.sk>),
- **the student's workload** is defined in the so-called Subject plans for individual subjects separately. The workload depends on the number of credits and is budgeted for lectures, seminars, projects, and independent study in order to fulfill ECTS rules (EHEA).
- **Credits** are assigned to each subject separately. The share of profile subjects is as follows:

Profile subjects of the study program in total	95 credits
Other subjects of the study program in total	41 credits
In sum	136 credits
Covering the core of the field of study with profile subjects of SR	69.85%
